LABOR DAY PROGRAM HAS BEEN ARRANGED

Labor Unions Complete Plans For Big-
gest Celebration In The His-
tory of The City.

Committees from the various la-
bor unions of this city have complet-
ed arrangements for the celebration
of Labor Day and the occasion prom-
ises to be one of the biggest events
held in Rhinelander this year. Ac-
cording to present plans the celebra-
tion will be better and brighter than
that of last year. The usual festi-
vities of July 4th will not com-
pare with the doings to take place
in this city on the working man's own
holiday, Monday September 6th.

Large posters announcing the at-
tractions and program for that day
have been printed. A number of
these bills have been distributed
throughout the neighboring towns and
it is expected that there will be a
large crowd of strangers in the city
on that day.

The day's program will open at
9:30 o'clock with a monster parade in
which all trades unions and fraternal
organizations will participate. To
the lodge having the largest num-
ber of men in line a pennant valued
at ten dollars will be given as a prize.
A similar pennant will also be
given to the lodge having the largest per centage of all
its members in line.

At the Pelican grove the exercises
of the day will be conducted. Mayor
Anderle will make the opening ad-
dress. Harvey Dee Brown of Mil-
waukee will be the principal speaker
and will select a topic appropriate
for the occasion. There will be a
long program of races, contests and
sports of all kinds. For these, prizes
donated by the business men of
Rhinelander, will be offered. The list
of prizes and donors follows.

SOO MAY MOVE DIVISION

Rumor that Railway Will Locate
Terminal at North Crandon.

It is reported that the Soo rail-
way company intends to establish a
division point at North Crandon.

Some weeks ago the Soo acquired
an option on a large tract of land
there but the time limit expired and
the option was rendered void. Now
according to the Forest Republican of
Crandon the railway company wants
a second option on the land but this
the owners refuse to grant. From
a fairly reliable source it is learned
that the Soo may in time remove
its division from this city to that
village. The story, however, is given
little credit by the majority of the
train men running through Rhine-
lander as they can see no real reason
why the company would want to
make the change. It is generally
believed that this rumor is about on
the same unreliable order as that
regarding the new depot which the
Soo has been going to build here
so many times. Not yet but never.

At North Crandon the people are
a little excited over the recent move-
ments of the Soo and many are
looking forward to a bright future
for that place. The price of real es-
tate there is already said to be slow-
ly advancing.

AUTO DRIVER FINED FOR FAST DRIVING

Matt Kristenson Is Arrested When His
Machine Narrowly Misses
Striking Little Girl

In municipal court Tuesday, Matt
Kristenson pleaded guilty to the
charge of running his automobile
in excess of the speed limit and was
fined ten dollars and costs by Judge
Walker. This is the second time
that Mr. Kristenson has been taken
before the court for the same offense.
The first time, just a few weeks a-
go, he was fined five dollars and
costs.

Chief Straub, who arrested Mr.
Kristenson, was the main witness a-
gainst him. The officer claims that
the autoist was speeding his car at a
rate of between fifteen and twenty
miles an hour. At the corner of
Brown and lives streets the car
turned and as it did so a little girl,
who unmindful of any danger, at-
tempted to walk across the crossing,
and the machine narrowly averted
striking her. The chief says that
he expected to see an accident but
fortunately the car switched sudden-
ly to one side and flashed past the
child.

The experience of Mr. Kristenson
should prove a warning to many
other Rhinelander autoists who are
fans. Sohr again starred at center
in the habit of running their cars at
a high speed through the streets of
the city. The police are going to
make an effort to suppress this
reckless driving and will not hesi-
tate to arrest any chauffeur who
falls to drive his machine at a speed
within the limit prescribed by the
ordinance.

The officers state that many au-
tomobile owners neglect to tuck the horns
on their cars when about to turn a cor-
ner or go over a crossing. On this
account pedestrians are given no
warning of the approach of a ma-
chine and assume the danger of be-
ing struck down and meeting with
serious if not fatal injuries. This
is particularly the case at right.

The number of accidents caused
by automobiles in different cities
of the state is reaching an alarming
figure. Scarcely a day passes but
what the newspapers contain ac-
counts of people meeting with in-
jury or death either from being
hit by a machine or while riding in
one. The majority of these acci-
dents are caused by fast speeding or
by some other carelessness on the
part of the drivers of the cars. Luck-
ily no accidents of this nature have
as yet occurred in Rhinelander.

CHILD NEARLY DROWNED

Ollie Irick, eight years of age,
had a close call from drowning Sun-
day, while playing on some logs in
the pond near the boat houses. She
slipped off one of the timbers into
the water and sank below the sur-
face. A. W. Brown, who happened
to be near, witnessed the accident
and rushed to the child's rescue.

COLTS LOSE THIRD GAME WITH ANTIGO

Battle Goes Thirteen Innings and the
Score Stands 2 to 1—Large
Crowd In Attendance

The most exciting base ball game
ever played on the Antigo diamond
took place there last Sunday between
the team of that city and the Rhine-
lander team. Thirteen innings were
required to complete the game at
the end of which the score was 2 to
1 in favor of Antigo. Every mo-
ment of play was one of intense in-
terest to the record-breaking crowd
in attendance.

The game was called at 3:50 o'-
clock by Umpire Kelley of Kaukauna,
who was engaged for this occa-
sion owing to his familiarity with
the game and reputation for impar-
tiality. In the first inning, Burdett
the first man at bat, was retired on
a line drive to center. Fenner,
the next man, was put out from Nel-
son to first. Roach hit a fly to
right field which was dropped and
Bies followed with a slashing drive
in the same territory sending Roach
to second where they were both left
on a forced play from short to third.
For Antigo, Mohr hit the ball to
Thompson at second and was easily
thrown out at first. Garlie and
Wauk hit to third and second re-
spectively and were retired at the
first station. Rhinelander was retired
in one, two, three order un-
til the seventh inning when
O'Melia, second man at bat,
drove a line hit to center and
by fast sprinting stretched it into
a two bagger and was driven home
by Rooney. The ball hit third base
and stopped in its flight otherwise.
Sohr, who had been hit by the pit-
cher, would have also scored. An-
tigo scored its first run in the
fifth inning, McIntyre being hit
in the head by a pitched ball, and
after recovering, was given first base.
He was sacrificed to second and scored
on a fly ball which fell safely be-
tween O'Melia and Sohr. There was
no more scoring done until the thir-
teenth inning when Nelson, for An-
tigo, hit to Bies, and Rooney speed-
ed over to first and covered the
base for the out. This was a very
pretty play and was loudly applauded.
The next man was given a base on
balls and went to third on a two
base hit by Garlie and was sent
home on a line hit by Wauk. This
was sufficient to win the game for
Antigo.

Features Of Game

The features of the game was the
fielding of bunt hits by Rooney, the
new pitcher for Rhinelander, which
proved a revelation to the Antigo
fans. Sohr again starred at center
having six put outs to his credit on
being a terrific line hit over his
head. The moment the ball left the
bat he turned and running with the
reckless driving and will not hesi-
tate to arrest any chauffeur who
falls to drive his machine at a speed
within the limit prescribed by the
ordinance.

The exhibition of pitching of both
Rooney and Nelson was of a high
order and showed that these clever
boys are almost ready for faster con-
pany.

Antigo and Rhinelander will meet
again on the Antigo field on Sun-
day and Monday, September 5th and
6th.

WANT AN INDIAN NAME

From the Antigo Journal it is
learned that a number of people who
own cottages and property on the
lake known as Enterprise, near El-
cio, are making an effort to change
this name by common usage to that
of "Malshkenosha," pronounced mu-
sh-kee-noo-sa.

This is the name which the Indians
gave it ages ago and by which the
Indians of today know it. The name
means, in their language, "big fish."
There is a pretty Indian legend of
this lake and its big fish told by some
of the Indians which are residents of
that locality and it seems very fitting
that the Indian name should be a-
dopted. It is much prettier than the
bare, commercial name; "Enter-
prise."

WILL OPEN GROCERY STORE

Markham & Parker Will Be Ready
For Business on September 1.

Another new grocery store will
open September 1 in this city. The
firm will consist of F. E. Parker and
E. H. Markham and will be known as
Markham & Parker.

The store will be located in the
building on Davenport Street until
recently occupied by Hammer & John-
son. A large stock of high grade
staple and fancy groceries will be on
sale. The firm will operate no deliv-
ery wagon and by the saving of this
expense will be able to sell goods at
the very lowest prices. This system
is in practice in the west and in many
of the larger cities and has been a
success.

At the new store a strictly cash
business will be conducted. The
firm will extend no credit but will
use all alike and guarantees to give
patrons full value for their money.

Messrs. Markham and Parker need
no introduction to the citizens of
Rhinelander both having resided in
the city for years. Mr. Markham has
had much experience in the grocery
business while to Mr. Parker the ven-
ture is comparatively new. Both
enterprising and conservative busi-
ness men and that they will succeed
in their undertaking there is no
doubt.

THREATENS TO TAKE LIFE OF DONNELLY

David Houle Points Rifle at Three
Lakes Man and Pleads Guilty
To the Charge

On complaint made by James Don-
nelly of Three Lakes, David Houle,
also of that village, was arraigned be-
fore Judge Walker in municipal court
Tuesday, charged with having point-
ed a rifle at Mr. Donnelly with a
threat to shoot. The defendant
pleaded guilty to the charge and was
sentenced to pay a fine of fifty dol-
lars and costs and in default of pay-
ment to spend ninety days in the
county jail. Sentence was suspended
until the court shall order same to be
executed. This was done in order to
give Mr. Houle an opportunity to
mend his rough and rowdy ways. He
was also required to furnish a bond
of five hundred dollars that he would
be good for a period of six months.

Houle, it is alleged, occasionally in-
dulges in the liberal use of liquor and
when under its influence goes seeking
for trouble with certain residents of
Three Lakes.

The following witnesses were here
on the case: Mrs. C. J. Kuney, Mr.
and Mrs. Jas. Donnelly, Edrice Don-
nelly, J. H. Korzelius, Antone Bur-
graff, Chas. Goldinski, Ed. Stauell
W. J. Neu, Frank Federer, Ben
Pomies, Peter Burkoski and Antone
Crawford.

O. A. HILGERMAN FINED

O. A. Hilgerman, proprietor of the
Rhinelander Brewing Company, was
found guilty of delivering beer on
Sunday and fined twenty dollars in
Justice LaSelle's court, Tuesday after-
noon. Mr. Hilgerman was arrested
on the above charge several days ago
but the case was continued for one
week. In court he refused to talk re-
garding the case and did not enter
any plea. The chief witness against
him was Peter Jackson, who was un-
til recently a teamster in Mr. Hilger-
man's employ. Jackson testified to
having delivered beer on Sunday.

As this was the first case for viola-
tion of the Sunday closing law in
Rhinelander it attracted no little at-
tention.

DUSAULT NOT GUILTY

In municipal court Tuesday, John
Dusaault of Monico was found not
guilty of an assault and battery
charge. The charge was made by
Robt. McGillis but owing to lack of
evidence the defendant was discharg-
ed.

TWO GAMES WITH BARRON

There will be two big base ball
games played here between the Bar-
ron and Rhinelander teams next
Sunday and Monday. Barron has a
team comprised of all salaried play-
ers and they have won the majority
of games played this season. They
have the reputation of being the fast-
est team along the Soo line. The
expense of getting this team here
is very heavy and it is hoped that
the fans will liberally patronize both
games.

To every open air hobby,
To every delight of nature,
To the very Spirit of the
Great Out-of-Doors,
There is an added charm

SAWTELL

FROM NEARBY TOWNS

Oconto—Congressman Gustave Ku-
esterman after recuperating about ten
days at his home in Green Bay, re-
turned Oconto Tuesday. His mission here
was to acquire more data and figures
relative to the prospective harbor.
He seems to be very confident that
after the survey is made that the
engineers will report favorably for
an appropriation and the people here
are hoping that his confidence will be
realized since Oconto county is great-
ly in need of water shipping facili-
ties.

Park Falls—The Atwood Lumber
company's planing mill will
be finished as soon as mechanical
skill can do so. As soon as every-
thing can be completed the large saw
mill will commence running nights
as well as days and employ a large
crew of men. The company will soon
commence its immense dry shed.
This building will cover a stretch of
ground over 600 feet in length and
will contain all of the dressed lum-
ber put out by the big mill.

New London—Harry Storey, wait-
ed at Merrill on a charge of assault-
ing a woman, made a desperate ef-
fort to escape after being placed un-
der arrest here. He got away from
the officer and after a long chase
found a hiding place in the woods
of the Episcopal church grounds,
where he was recaptured.

Oconto—A repetition of last
spring's canine scare occurred here
when it was learned that a large el-
derly dog owned by Erb Jarvey seemed
to run amuck on the main street of
the city by grabbing hold of several
other brutes of his tribe, giving them
a quick but savage jerk and then
trot along until he would meet an-
other canine victim. Great fear is ex-
pressed that the dog had rabies and
it may be necessary to kill all dogs
bitten by him.

Wausau—It is believed that the
man who was found dead in Shaw-
ano county early last week was mur-
dered. A bullet hole through the
head and two through the victim's
hat, and the position of the body, it

being found under a wire fence al-
most concealed from view, leads the
officers to think he met with foul
play. The man was evidently a la-
borer. There was nothing on the
body to identify him and the re-
mains were badly decomposed.

Prentice—The little year old daugh-
ter of Mr. and Mrs. Kallie Anderson
who live at Brantwood, fell into a
tub of water and was drowned. Thurs-
day afternoon. The mother of the
child was out picking berries and
knew nothing of the sad accident un-
til she discovered the baby's body in
the tub.

Stevens Point—It is now officially
stated that the Soo line will not re-
move its car shops from Fond du Lac.
A number of Soo officers visited
Fond du Lac recently and after an
inspection of the shops expressed
themselves as much pleased with
the location and announced that the
company intended to keep the shops
there permanently. Employees have
been advised to purchase permanent
homes there.

Grand Rapids—For some time past
the agent of the Green Bay & West-
ern railroad, A. D. Hill, in this city
has been missing money out of the
sale ticket drawer, the total amount
being about \$200. Hill set a trap
and was successful in making a cap-
ture the thief proving to be a lad
who usually made his headquarters
around the depot. The boy was ar-
rested and at first denied the charge
but later confessed and gave up \$120
which he had hidden in the tool room
near the depot.

Ashland—Fire broke out Saturday
night on the docks of the Schroeder
Lumber company and a loss of ap-
proximately \$130,000 resulted. Between five
million and six million feet of the
choicest lumber in the yards was de-
stroyed. The dock was badly dam-
aged and will have to be rebuilt. For
a time the Soo line docks were threat-
ened and the firemen worked over
eighteen hours before they had the
blaze under control. The loss is cov-
ered by insurance.

Ladysmith—The son of the pro-
prietor of a resort known as "111"
near this city, was shot and fatal-
ly wounded by Chief of Police Cul-
ver. The young man was in a drunk-
en frenzy and attacked the Chief with
a butcher knife. In order to defend
himself it became necessary for the
officer to shoot.

Chamberlain's Colic, Cholera and Diarrhoea
Remedy Never Known to Fail

"I have used Chamberlain's Colic,
Cholera and Diarrhoea Remedy since
it was first introduced to the public
in 1872, and have never found one in-
stance where a cure was not speedily
effected by its use. I have been a
commercial traveler for eighteen
years, and never start out on a trip
without this, my faithful friend,"
says H. S. Nichols of Oakland, Ind.
Ter. For sale by F. L. Hinman & Co.

BUSY TIMES AT LAONA

The Connor mill at Laona is be-
ing rebuilt and electric power will
hereafter run the machinery. An im-
mense addition is being made to the
lumber company's plant. The
Connor company intends to build
a large number of houses at Laona
next year for use of its men, of whom
there are from 300 to 700 as the work
demands.

GOOD WORK

Done Daily in Rhinelander. Many
Citizens Tell of It.

Nearly every reader has heard of
Doan's Kidney Pills. Their good
work in Rhinelander still continues
and our citizens are constantly adding
endorsement by public testimony.
No better proof of merit can be had
than the experience of friends and
neighbors. Read this case:

Mrs. John Hull, of 722 Dorr Ave.,
Rhinelander, Wis., says:

"About a year ago I was sudden-
ly attacked with kidney trouble. The
first symptom was a severe pain in
the small of the back, then my sides
began to ache and I had frequent
headaches. I also noticed that the
kidney secretions were unnatural and
finally procured Doan's Kidney Pills
at Reardon's drug store. They en-
tirely relieved me and I have had
no kidney trouble since."

For sale by all dealers. Price 50
cents. Foster-Milburn Co., Buffalo,
New York, sole agents for the United
States.

Remember the name—Doan's—and
take no other.

NOTICE

City Clerk's office,
City of Rhinelander.

Notice is hereby given that on the
25th day of August 1909 at the hour
of 2 p. m. the Board of Public Works
of the said City of Rhinelander, will
meet at the City Clerk's office in the
city hall building of said city, for
the purpose of hearing any objection
that may be made against the sewer
assessments for sewer benefits on
the following named sewer extensions
to wit:

On Phillip street from Messer
street to the S. W. corner of Paper
Mill Plat of Block 6 of the Orig-
inal Plat.

On Messer street from Harvey st.
to High street.

On Keenan street 150 ft. north of
Kemp to Park street thence on New-
bold street to Pelham street, and
that all persons interested may ap-
pear and be heard upon the matter
of the assessment and the expense
therein provided for among the lots
in the said sewerage districts.

Signed,
GUST. SWEDBERG,
Sec. of the Board of Public Works.
Dated, Aug. 12th, 1909. a19-25

EDITOR CARR IMPROVING

Mr. Carr, the publisher of The
Press, got home last night from a
three weeks sojourn in the hospital
at Oshkosh. He is on the mend now
although another abscess opened in
his face on Tuesday. The fever
which he had resulted in greatly re-
ducing his strength so that it will
be some time probably before he
can be very active but prospects are
now favorable for a complete re-
covery.—New London Press.

BASS FROM MISSISSIPPI

A few days ago the State Fish
Commission planted in the Minocqua
and Tomahawk lakes nearly 3500
black bass taken from the waters of
the Mississippi river. The fish av-
eraged three inches in length. As
bass mature rapidly it will not be
long before these fish will be of suf-
ficient size to permit catching.

Ben Hur tea has that delicious
flavor all its own.

BANK ROBBERS SENTENCED.

McCary and Clermont, the two men
held for the robbery of the bank
at Warren, Monroe county, pleaded
guilty to the charge and were each
sentenced to eight years at hard
labor in the state prison at Waupun.

Clermont, it will be remembered,
was arrested in this city in com-
pany with another suspect named Had-
ley. Both men made their escape
from the Sparta jail but Clermont was
captured a few weeks ago at Elong
Junction. Hadley is still at large.
McCary, one of the smoothest crooks
known to the northern police, is the
ring leader of the gang. Detectives
were on his trail for over a year and
despite the fact that he was bold in
his movements he always succeeded
in avoiding arrest until about a
month ago when he was taken un-
aware and easily captured at Wau-
saukee.

He frequently came to Rhinelander
usually transferring from train
here in the night hours.

NEW POSTAL CARDS

New postal cards will be issued by
the United States postoffice depart-
ment. The new cards will be smaller
more artistic, of a better grade of
paper, of a different color and in fact
will be a much improved card in
every way. The new cards will be
ready about Jan. 1, 1910, and about
75,000,000 cards will be printed each
month. The present cards, so Post-
master General Hitchcock decides,
do not come up to the standard set
by other countries in their postal
cards.

Due probably to the fact that the
present card is too large for index
purpose, the new cards will be made
much smaller. Business men who
send out post cards for collection of
statistics and similar purposes have
let it be known that a smaller card
would be much more convenient for
index purposes and the postal depart-
ment has accepted the suggestion.—

Granulated Sore Eyes Cured

"For twenty years I suffered from
a bad case of granulated sore eyes,
says Martin Boyd of Henrietta, Ky.
In February, 1902, a gentleman asked
to try Chamberlain's Salve. I
bought one box and used about two-
thirds of it and my eyes have not given
me any trouble since." This salve is
or sale by F. L. Hinman & Co.

BAD FOR JAIL BIRDS.

If county boards choose to they can
make life assume a serious aspect for
jail birds. The legislature last winter
passed a new law the provisions of
which give county boards authority to
provide in a convenient place near the
county jail a quantity of stone and ap-
propriate implements for the break-
ing of the same into suitable material
for road making purposes. In coun-
ties where this is done all persons
convicted in any court and sentenced
and committed to imprisonment in
the county jail where such stone and
rock are provided, shall be employed
in breaking stones and rock for the
building and repairing of public high-
ways for a period of not more than
eight hours each day, Sundays and
all legal holidays excepted. It is
provided, however, that such labor
shall not be required of female pris-
oners, nor of any male prisoners who
has been declared by the county
physician as being physically unable
to perform such labor.

Take Notice.

All persons are recommended to
take Foley's Kidney Remedy for
backache, rheumatism, and kidney
and bladder trouble. It will quickly
correct urinary irregularities, which if
neglected, may develop into a serious
illness. It will restore health and
strength. Do not neglect signs of
kidney or bladder trouble and risk
Bright's disease or diabetes. J. J.
Reardon.

Crane's Linen Lawn

THE wonderfully clear white color of Crane's
Linen Lawn is partly due to the perfectly pure
artesian water which is used in making it. A white
paper should be white. Crane's Linen Lawn
is.

The thing to remember in buying fine writing
paper is not merely the words "Linen Lawn," but
the name "Crane's." It is Crane's way of making
writing papers that has made Crane's Linen Lawn
the best writing paper.

E. C. Sturdevant, Clerk Circuit Court, Oneda County, Wis.

The way to reckon the cost of painting is to put both costs together—the cost of paint, and of putting on.

It costs as much to put on one paint as another; if you use as many gallons of one paint as another, the putting on cost is the same.

But if you use Devco Lead-and-Zinc Paint you'll use less gallons by half or a third. Hundreds of cases prove that Devco requires less gallons than any other paint for the same service.

Buy by the name: Devco.

The Milwaukee Brewers won yesterday from the Minneapolis Millers by a 7 to 4 score. This places the Milwaukee ball team at the head of the list in the American Association with Minneapolis a close second.

The New York investigation of the workings of the primary election law revises much of the old prejudice against it. The old down-and-out politicians' condemn it in toto. While the average man fully realizes that the primary law is not perfect, he sees the corruption of the old convention system and has no desire to return to that method of nomination. The thing to do is to improve the direct primary and restrict expenditure as it is the only true way to select candidates.

Colonel Hicks of The Oshkosh Northwestern says that the candidacy of S. A. Cook for governor is a joke. He says that Cook's supporters look wise and tell Mr. Cook how anxious the people are to make him governor and at the same time turn their heads and smile, as much as to say, we have fooled you. This is a surprising announcement from Hicks whose paper has always been an ardent supporter of Mr. Cook in all his efforts to secure public office. Mr. Hicks seems to think that Mr. Cook is a has been.

The officers of the Oneida County Fair Association are doing much to improve conditions in readiness for the fair to be held September 8, 9 and 10. Every inducement has been made to have residents of the county compete for the prizes and there is a feeling that large numbers will respond. Now carpenters are at work improving the buildings. No one need fear damage to goods entered on account of rain, as the buildings are now being reshingled and generally improved. Everything points to one of the largest and most successful fairs ever held in Oneida county.

Secretary Ballinger is again in trouble; he is now accused of favoring a large corporation in his decisions, whose attorney he was until he took his present position as Secretary of the Interior. Mr. Ballinger poses as a man profound in the law and dwells much on the unconstitutionality of steps taken by former President Roosevelt in withdrawing lands from market. If the Secretary is proven to be badly mixed up in his decisions to help out former plutocratic clients, his wise talk of constitutionality may not benefit him much.

The Eastern papers lay many of the ills of this country to the West and Middle West. They say the progressives keep on talking about the tariff is past, while Cannon, Aldrich and their friends remain quiet. They say Dooliver, Cummins, Bristow and LaFollette are exceedingly active on the platform. They reach the conclusion that a "progressive" can be defined as "a fellow who keeps on talking." The provincialism consists in overlooking the fact that if the progressives do some talking by way of report to their constituents, the Aldriches do some also by way of report to theirs; the difference being that the progressives talk out loud to many, while the Aldriches talk quietly to a few.

LOSE LITTLE DAUGHTER

The little daughter of Mr. and Mrs. Leonard Gilley died Monday night after an illness of only a few hours. Bowel complaint was the cause of death. The child was one year and six months of age. Her sudden death comes as a sad blow to the parents who have the sympathy of the community.

Mr. and Mrs. J. M. Robinson and Mr. and Mrs. Frank E. Robinson of Milwaukee have been guests of C. F. Shepard and W. W. Carr. Mrs. Robinson is an expert swimmer and has won prizes in many contests.

A THRILLING AUTO TRIP

Chas. Conro Runs Big Touring Car Over Railroad Trestle

Chas. Conro and Russell Diller made a trip to the northern part of the state this week in Mr. Conro's White Steamer touring car. They chose their route via Prentice to Mellen and Ashland and thence south to Saxon and Ironwood. Russell returned home Monday but will leave within a few days to join Mr. Conro at one of the northern cities for an auto trip through upper Michigan. Russell says that the journey between this city and Ashland was not a very pleasant one owing to the poor condition of the roads. The recent floods had rendered the highways in many places almost impassable.

At one point on the trip the road ran close to the railroad track and as it was necessary to cross a stream the daring autoists ran the machine over the railroad trestle rather than risk crossing over the wagon bridge which did not appear safe. This ride was somewhat on the order of thrillers and Russell admits that he did get a little nervous before the end of the structure was reached. The big car bounded along over the ties at a merry clip and with as much ease as a Pullman sleeper.

SOO BRAKEMAN IS KILLED

John Brandin Falls In Front of Engine While Switching

John Brandin a Soo line freight brakeman, met his death Sunday night while switching at a town in North Dakota.

While details of the accident are difficult to learn it is stated that Mr. Brandin attempted to jump on the pilot of the engine but slipped and fell in front of the train. The engine and two cars passed over him and his body was horribly mangled.

Mr. Brandin was for several years a resident of Rhinelander having had charge of section work for the Soo company. He made a large number of friends here and the news of his shocking death is received with deep sorrow.

Mr. Brandin was engaged to a young lady at Minneapolis and the wedding was to have taken place in October.

The funeral was held yesterday afternoon from the residence of Jerry O'Connor at Minneapolis. Mr. J. Slattery and Michael Mahoney were in attendance as delegates from the A. O. U. lodge of this city of which deceased was a member.

GOVERNOR'S PROCLAMATION

Governor Davidson has issued the following Labor Day proclamation.

"The problems of labor are of surpassing consequence to society in general. In the industrial field the importance of labor is so great that its prosperity determines industrial conditions, and the realization of its ideals means prosperity. It is fitting and proper that opportunity should be afforded to consider and discuss the problems of labor and their relation to society as a whole. To the end that employees and employers may meet on a common level and consider what may be of mutual benefit, I, J. O. Davidson, governor of the state of Wisconsin, by virtue of the authority vested me by law, designate Monday, September 6, 1909, as labor day, and recommend that Wisconsin establishments employing labor be closed upon that day and that employers cooperate with employees in every possible way in worthy observance of this occasion for deliberation."

In testimony whereof, I have hereunto set my hand and caused the great seal of the state of Wisconsin to be affixed. Done at the capitol, in the city of Madison, this seventeenth day of August in the year of our Lord one thousand nine hundred and nine.

JAMES O. DAVIDSON.

By the governor:

J. A. FREEB, Secretary of State.

BALLINGER MAY BE RETIRED AS A RESULT OF THE INVESTIGATION.

WASHINGTON, D. C., Aug. 25.—President Taft has called upon the Interior department for a full report regarding the Cunningham cases, involving coal land claims in Alaska in the Chugach forest reserve.

The order was received here by Acting Secretary Pierce of the department, and it is understood that Secretary Ballinger, who is now in the west, has also been requested to make a statement on the subject.

The result of the investigation is likely to involve the retirement of Secretary Ballinger.

NORTHERN WISCONSIN RICH IN FARM LANDS

Commissioner Of Immigration writes Of Soil—Air Is Laden With Ozone

The slogan, "Get back to the land," is heard upon every hand. Whether inspired by the effect of rising prices for foodstuffs or from some other motive is not material. The fact is that the long prevailing movement from country to city has so upset the social equilibrium that to "get back to the land" is absolutely essential. If the cost of foodstuffs is not to become unbearable, it is unnecessary to quote statistics showing the relative numbers engaged in rural and urban pursuits by decades; the food problems too clearly proclaim the necessity of a reverse movement.

Advice to "get back to land" has been given by millions of tongues and pens. The soundness of the advice is conceded by all. The city wage-earner has heard it and read it, and is doubtless endeavoring to determine where, with his limited capital and perhaps equally small experience, he had better go. Perhaps he has but a few hundred dollars that he has been saving from none too large wages to buy a home. If he is to "get back to land," where had he better go?

He has a choice of several propositions:

1. He may buy a high-priced farm and go heavily in debt, which he will hesitate to do.

2. He may go to distant points on the western plains and undertake the methods known as "dry-farming," which the government year book advises him not to do unless he can buy stock and equip a section or more of land and have a reserve fund.

3. He may renounce his home country and go to foreign lands.

He may go into the hard wood timber belt that extends across northern Wisconsin lapping over into Michigan on one side and Minnesota on the other.

Finds Splendid Ozone

And what will he find there? He will be impressed with the splendid ozone-laden atmosphere that is such a relief to people with bronchial troubles and hay fever as to have attracted great attention. He will enjoy the clear, pure, soft water and note the pride taken in good roads and schools. If he is away from settlements he will wonder how clever and timothy came to grow where no man appears ever to have been.

If in the fall he will be astounded by the abundance of raspberries and blackberries in the openings and blueberries and cranberries in the marshes that go to waste every year. He will see deer and other game in the woods and will be sure that rivers and lakes of such water as he finds must be filled with fish.

Upon inspection of farms in the settlements he will be impressed by the wonderfully green and productive pastures, the well filled hay-mows and the fine dairy cows. He will be surprised to find cornfields and no less surprised at the quality, as well as quantity, of potatoes and root crops. In some sections he will see immense crops of sugar beets, tobacco, clover seed and he will be told that truck gardening can be carried on with handsome returns and that small fruit does wonderfully well—and he notes the great frequency of manufacturing towns that need these things.

Settlers Clear Lands

The fact that fuel and building material are at hand will not escape him. He sees settlers clearing more land while their crops are growing and learns that every piece of timber large enough for fuel has a value and that while clearing the settlers are obtaining an income discounting that of the factory worker.

He inquires of the settlers as to their experiences. They had but a few hundred dollars when they came. They have lived well and haven't overworked. Their clearings have advanced in value. They have had no crop failures, no droughts, no hot winds, no cyclones and no floods. They have encountered none of the problems of the arts of dry farming or the science of irrigation agriculture—they have been confronted by neither the hazardous transportation of perishable products nor a fickle market beyond

personal contact. Their market takes must be looked upon as finally necessary. But I believe them to be movements that should be prosecuted by men of experience, wide adaptability and, especially of ample means. In this view I am supported by the experts of the federal agricultural departments and, I believe by all the essential elements of the situation.

The men of means and experience and speculative instinct who go to those distant points to win or lose in their efforts deserve the plaudits of all. Let them do it while people without expert ability or means to hazard are developing our fertile Wisconsin areas into fine farms with beautiful homes.

What of The Future?

What of the future? This area is specially suited to dairying and stockraising. The clovers, alfalfa and peas thrive wonderfully and assure that these lands need never be lacking in nitrogen which is so essential in land. Clover plowed under adds humus. Barnyard manures furnish phosphorus and other essential ingredients. This assures continual fertility without the heavy outlay for commercial fertilizers, common to most sections. Settlers should construct silos soon as possible, as northern Wisconsin corn makes wonderfully valuable silage the form in which corn should be fed. Analysis has shown the clover and alfalfa of this region to be much superior in protein than that of southern sections—a very interesting fact to the dairyman and stock raiser.

Throughout this great area are almost numberless magnificent water powers, the early development of which will be forced by the increasing cost of coal. Many are now developed and at each a prosperous manufacturing town is springing up. The process of harnessing these powers is continually going on.

The effect of these industries, and the cities they are building, on the increased future value of farms in this section should be a matter of intense interest to home-seekers. The fact that improved farms in this partially settled area are held around \$100 per acre is a suggestion of their future worth when the country is fully developed industrially as well as agriculturally.

The writer of this article has no desire to minimize irrigation and dry farming as features in our agricultural activity—far from it, for both

DAVE KELLY IS DEAD

Popular Soo Conductor Passes Away At
Minneapolis Hospital.

The many friends in this city of Conductor Dave Kelly of the Soo line were sadly surprised to hear that his death occurred Saturday afternoon in a hospital at Minneapolis.

Mr. Kelly had been in ill health for the last few years the nature of his complaint being cancer of the stomach.

He was one of the best known and most popular passenger conductors on the Soo road. His run was on trains 84 and 85 between Minneapolis and Pembine. At one time he resided in Rhinelander.

Mr. Kelly made his last trip through this city last Thursday. On that day he was suffering intense pain and told his friends that he was going to enter the hospital and submit to an operation. He was very low spirited and expressed fear that the operation would prove fatal.

Mr. Kelly was always of a genial nature and among the Soo railroad men and the traveling public he will be greatly missed.

The funeral was conducted yesterday from his home at Minneapolis.

SOME ONEIDA COUNTY CORN

One Stalk Is Ten Feet Seven Inches
In Length

Last week's Steven's Point Gazette contained an article regarding a corn stalk 9 ft. 9 in. in length raised on a Portage county farm and on exhibition at a grocery store at that city. On Saturday, Matt Stapleton brought to the city a cornstalk 10 feet 7 inches in length grown on his farm just south of this city. The stalk contained several ears of fine sweet corn and proved a great attraction at the Nichols Hardware company's store where it was exhibited.

Oneida county does not claim to compare with Portage county when it comes to being an agricultural section but we will not take a back seat in regard to producing big things in the vegetable line. Mr. Stapleton says the growth of his corn this year has been remarkable and he intends to place a number of the tallest stalks on exhibition at the State Fair at Milwaukee.

THE COLLECTOR WAS FIRM

He Wouldn't Let Man Enter Train
Without a Ticket.

For the first time since the Northwestern railway company has enlisted the services of train collectors, one of those august personages appeared on number 16, the south bound passenger train, Tuesday morning. When the train stopped at this station he took a position in front of the smoker and chair car entrances and requested all those about to enter the train to show their tickets. One man, in his haste, had neglected to purchase the coveted piece of paste board and he was promptly refused admittance to the coach. He protested that he had the coin with which to pay his fare but the collector was firm and would not allow him to pass. After arguing until the conductor gave the go ahead signal, the fellow rushed to the ticket window procured his ticket and just barely succeeded in catching the train.

One object of placing collectors on trains is to check up the conductors and prevent them from getting their money mixed with the railroad company's. With the Northwestern the system is a new one and it remains to be seen whether or not it will prove a success. The conductors, it is learned, do not take kindly to the collectors.

TEACHERS GET CERTIFICATES

The Chicago & Northwestern Adds to
Its Transcontinental Train
Service

New Train Between Chicago and
Portland, Oregon
Five Daily Transcontinental Trains
Required to Handle
Big Passenger Traffic

The latest announcement of increased passenger service to western points is made today by the Chicago & Northwestern Ry. A new train, to be known as the "Oregon-Washington Limited," will be placed in service August 22, leaving Chicago at 11:30 a. m., daily, arriving Portland 8:30, the third morning, and landing passengers in Tacoma and Seattle the same afternoon.

The new train will have an equipment that includes Pullman drawing-room sleeping cars, Pullman tourist sleeping cars, and free reclining chair cars. All of this equipment is handled between Chicago and Portland without change. These trains have a la carte dining car service of the highest character.

This is an addition to the present service via the electric-lighted Chicago-Portland Special, and gives to the public the choice of two through trains to the North Pacific Coast, each of which is operated on a three-day schedule via the Chicago, Union Pacific & Northwestern Line.

Chicago, Union Pacific and Northwestern Line to Salt Lake City, the Yellowstone Park, Portland and the Puget Sound country, may be attributed to two principal reasons: one is that by this route some of the most remarkable commercial and agricultural development that the West can boast of is to be seen, together with a magnificent group of scenic attractions which reach their climax on the 200-mile trip which these trains make along the banks of the Columbia River from Umatilla to Portland.

The other chief reason for the heavy travel attracted via this route is due to the extensive publicity that has been given to the fact that it is the only double track, automatic safety signal line between Chicago and the Missouri River, and the only route operated under automatic safety signals from Chicago to the Pacific Coast, while the train equipment and service are of such perfect type as to insure a steadily widening circle of patronage.

PLEASED WITH THE MUSIC

The Military Orchestra furnished music for a dancing party at Buck's Divide resort near Manitowish, Saturday evening. Those in attendance at the party were guests at the resort, many being people from Milwaukee, Chicago and other large cities. They were highly pleased with the music and it was necessary for the orchestra to respond to repeated encores.

BETZVILLE TALES

Aunt Rhinocolura Betz and the Absent Treatment

By Ellis Parker Butler
Author of "Pigs is Pigs" Etc.
ILLUSTRATED BY PETER NEWELL

An unfortunate thing happened to Aunt Rhinocolura Betz of Betzville, and for some time she had to temporarily retire from the best Betzville society, in which she is accustomed to mingle freely. Six months ago Aunt Rhinocolura began taking the new thought absent treatment from a beauty doctor at Philadelphia, and the waves arrived at her home every Thursday at 10 a. m. Although long a leader of Betzville society, Aunt Rhinocolura's nose has been a thorn in her side, so to speak, on account of its very pugliness. Experts in noses have remarked, in passing through our village, that Aunt Rhinocolura's nose was the limit. It was so short and stubby, with a swag-backed bridge, and a tilt toward higher and better things. For many years Aunt Rhinocolura intended seeing a beauty doctor about it, but kept putting it off until she received the circular from the Philadelphia man, who claimed to be able to beautify at long range. Although not having much faith she decided to try him.

For several treatments she did not seem to notice that the thought waves were having any effect on her nose, but she decided to be patient, knowing it was an extreme case, her nose having become chronic, as the doctors say, and, tough, but she did what she

a rabbit's, and then all our best society would rush up to see how much Aunt Rhinocolura's nose had grown. The most sanguine always claimed to be able to see considerable improvement each time, but at last even they had to admit that Aunt Rhinocolura's nose had worn down to a nubbin the size of a push button, and presently it did not look like anything but a dried pea—a little, wrinkled, yellow dried pea. And it was still shrinking!

Just then was when her cousin Gildad Betz came for a short visit, and the moment he saw Aunt Rhinocolura's nose he remarked that all was not well with it. It was about the size of a pin head by the time he had stayed over another treatment, and the only way Aunt Rhinocolura could tell she had a nose at all was by feeling for it gently with her little finger. Then she could feel something that felt like a grain of salt.

Then Cousin Gildad came right out and said he was having something done, and that he was taking thought waves from a beauty doctor at Philadelphia, and that the waves came every Wednesday at 4 p. m., but that he was getting hopeless. He said the thing was warts. He had had three warts on the back of his left hand, and he was taking the thought-wave treatment to have them removed, but

could not help the beauty waves by keeping her nose well vaselined and by massaging it with the flat of her thumb to render it soft and sympathetic. At the eighth treatment, however, she gave this up, for she was startled to find that, as she supposed, the massaging was gradually pushing her nose into her face. But when, after two more treatments, she found that her nose would no longer hold her eye-glasses, she knew the beauty doctor was really having some effect.

At first Aunt Rhinocolura was surprised to find her nose lessening in this way, and it was quite an annoyance not to be able to wear her nose glasses, but she got a pair of long-nettes, which she could hold in her hand, and got along very well. As for her nose retreating a little, she looked at it logically. She knew she had a very stubborn case of nose, and that it would be quite a feat to turn it into an aristocratic nose, with a beeline profile, and she knew that when a jumper is going to make an extraordinarily hard jump he usually steps back a few feet to get a good start, and she thought that probably her nose was just backing up a little to get a good ready for a big start.

So Aunt Rhinocolura rested peacefully, and every Thursday at 10 a. m. she would turn her nose toward Philadelphia and assume a quiescent state of mind, and the beauty waves would come hurtling along and impinge on her nose. So many citizens wanted to be present at the occasions when the waves arrived that she had to issue admission cards, and it was indeed affecting to see our best society sitting around Aunt Rhinocolura waiting for her nose to wiggle. It affected her nose that way. Exactly at 10 a. m. the waves would arrive, and for 15 minutes, while they continued, Aunt Rhinocolura's nose would tremble like

that as soon as the treatment began the warts began to grow, until they were so long he had to braid them and do them up in a coil to keep from stepping on them. He said he hoped it was part of the cure, but that if they got much longer he would write to the man. He said no man could expect to remain indolent while his warts were rapidly gaining the two-yard post.

By that time Aunt Rhinocolura's nose had shrunk until it was a mere reminiscence, and she persuaded Cousin Gildad that they ought to write to the beauty doctor, so they did. Come to find out, the office help had got the two Betz names mixed, and had entered them wrong on the card system, and the doctor had been giving Cousin Gildad a growing treatment for his warts and Aunt Rhinocolura an effacing treatment for her nose.

But the doctor was a most accommodating man, and he wrote that, although their course of treatment had expired in both cases, he would give them a postgraduate course at only half price. So the next Thursday at 10 a. m. he began, and at 10:15 Aunt Rhinocolura had enough nose to see with a microscope, but it was still more of a dent than a bump. And the next Wednesday at 4:15 p. m. Cousin Gildad measured his warts and found they had shrunk an inch. So he kept on with the treatment until his warts were all gone, but the very minute Aunt Rhinocolura found her nose back to its old size and specifications she turned her nose away from Philadelphia. But she will never be quite the same again, for whenever her nose happens to point in that direction accidentally it begins to tremble, and palpitate like a thing in distress.

GATHERING WILD RICE
The wild rice is ripening in Rice Lake and the Chippewas are moving down there preparatory to gathering the grain as they have for generations in the past. The crop is heavy this year, the lake being completely grown over.

The Indian needs no high priced machinery to do his harvesting. He gets into his birch bark canoe and pushes out into the rice beds, shaking the rice over the sides of the boat as he passes through. When he has a load he paddles home. A hole in the ground lined with a buck skin receives the grain and the squawa moccasined feet tread it out of the hulls. On a breezy day it is poured slowly from one dish to another and the winds of heaven clean it of the chaff. Wild rice is nourishing as any grain and is highly prized by the Indians.
Rice gathering is a holiday time with the people of the woods and few of them miss it.—Crandon Republican.

CATCH FIVE POUND BASS
Mr. and Mrs. Chas. Crusoe returned Friday from a week's outing at Sugar Camp resort. Mr. Crusoe had excellent luck as a fisherman and aside from capturing several fine pike landed the largest black bass caught in Indian Lake this summer. The fish weighed a trifle over five pounds and was a beautiful specimen. Mr. Crusoe speaks highly of the accommodations at Sugar Camp resort and of the hospitality extended to guests by Messrs Knapp and Jones, the general proprietors.

Cured Hay Fever And Summer Cold
A. S. Nausbaum, Batesville, Indiana, writes: "Last year, I suffered for three months with a summer cold so distressing that it interfered with my business. I had many of the symptoms of hay fever, and a doctor's prescription did not reach my case, and I took several medicines which seemed to aggravate it. Fortunately I insisted upon having Foley's Honey and Tar. It quickly cured me. My wife has since used Foley's Honey and Tar with the same success."

Intense Colicky Pains Relieved.
"For some years I suffered from intense colicky pains which would come on at times and from which I could find no relief," says I. S. Mason, of Beaver Dam, Ky. "Chamberlain's Colic, Cholera and Diarrhoea Remedy was recommended to me by a friend. After taking a few doses of the remedy I was entirely relieved. That was four years ago and there has been no return of the symptoms since that time." This remedy is for sale by F. L. Hinman & Co.

"Tempest and Sunshine" is billed to appear at the Opera House on Sunday, Aug. 29. The drama is taken from the well-known book of J. Holmes and it is too well known and widely read to need any further commendation.

W. F. Mann has presented it in his usual elaborate style, special attention being paid to costuming and settings, which period dates back before the war.

The cast is a notable one and some especially good features are promised.

New Course of Study for High School Recently Adopted By School Board

SUGGESTIONS.

Parents are advised strongly to help plan courses of study for their children. The work will then be more purposeful. Remember the schools should be run for your boy or girl, and if subjects are not afforded that should be, remember that a general demand will surely be heeded by those in authority. In arranging a course, the required units should always be taken as they occur. A considerable liberty will be allowed in choosing elective subjects, but it will be seen that they are arranged in groups. The languages form one group, commercial subjects another, etc. So far as possible then, (and making due allowance for misfits of early choices) subjects should follow in natural groupings. Students preparing for some particular college or university should look up its entrance requirements and plan to meet them fully.

The following are requirements to graduate from the several courses: Latin course, four units of Latin; Modern Classical course, four units of Latin and two of German; Science course, two units of any language and all the science offered; English course, no language required; Commercial course, four units of commercial branches.

Five year course. Many of our best schools now advise five year courses for students that have the time. This is very much to be desired for college preparatory students who are immature and too young to send away from home. Others, too, may well take time to master all the subjects offered in the home high school. In this way they may graduate from more than one course.

Study hours should be as strictly observed by students attending a home high school as would be expected and demanded at a boarding school. The high school work is planned on the basis that from two to four hours home study can be given and parents should see that this home study work is systematically done. Teachers will be very glad to co-operate with parents in trying to secure faithful work on the part of students.

STATE DAY AT FAIR

Wisconsin State day will be fittingly celebrated at the A-Y-P exposition on Wednesday, September 1, with appropriate ceremonies. It is estimated that there are 11,000 former Wisconsin people residing in Seattle, and this enterprising state made an appropriation to maintain headquarters at the exposition.

A special excursion train from Milwaukee will bring several hundred visitors and a band. An appropriate souvenir badge will be provided for every visitor, and a system of registration perfected by which everyone will be able to locate their friends and acquaintances. Wisconsin day will be one of the big days of the fair.

GO TO DENVER

Oswald Rahrlicht, L. F. Klenke and J. Kerswell left Tuesday morning for Denver, Col. Mr. Klenke intends to remain there permanently while Messrs. Rahrlicht and Kerswell may also decide to locate in the west providing the country is to their liking. Mr. Klenke's family, now visiting at Stevens Point, will join him later.

At this office, fine map hangers consisting of three maps, one of the world, one of Wisconsin, one of the United States and the Panama Canal Region. A fund of information in small space should be in every home Price 25c.

NEVER RECEIVED MONEY

Clifton Keeler, of Enterprise writes that he understands a collection was taken up in Rhineland for his benefit at the time he lost his children and home by fire. Mr. Keeler states that he never received any of the money and if such a subscription was circulated others than he benefited by it.

Mr. Keeler is an old resident of that part of the county and was formerly a member of the Onelda County board.

CARD OF THANKS

To the many kind friends and neighbors who so kindly assisted and sympathized with us during our sad bereavement, the death of our husband and father, we wish to extend our heartfelt thanks. To the members of the S. H. & E. F. and Daughters of Norway lodges we also wish to express our gratitude for their kindness.

Mrs. HANS HANSON AND CHILDREN.

NEW ATTORNEY.

Another new attorney, R. J. Morter, has located in Rhineland. Mr. Morter comes from Lodi, this state, and he is a graduate of Wisconsin University law school. He has opened offices in rooms over the Buck Clothing House at 31 1/2 Brown Street. Mr. Morter has much faith in the future of Rhineland and believes there is a good opportunity here for one of his profession.

BITTER MEMORIES.

Passenger (on branch line)—Say, why does the engine always set up such a piteous howl at this particular spot?

Guard—Ah! It was here the engineer first met his wife.

Modern Ideas Grafted on Ancient. The ceremony of cutting the wedding cake, which falls to the bride, is a survival of the old Roman "eating together," which signified that the bride was reconciled to her lot and that the husband granted her a share of his property, and the habit of putting back her veil is a remnant of savage custom, which decrees a woman must dress differently after her marriage to signify she is a wife.

Business is Business. The judgment of Solomon is out of date. A woman who gave away her child in infancy and desired to get it back is repulsed by the courts, not even getting an offer of half of it. A bargain is a bargain in these material days.—Philadelphia Inquirer.

The Superiority. The superiority of man to nature is continually illustrated. Nature needs an immense quantity of quills to make a goose with, but a man can make a goose of himself with one.—Christian Register.

The Last Trumpet. First Farmer (pointing to the faring born on an automobile)—"What's that thing for?" Second Farmer—"That's th' thing they blow jes' before they run y' down!"—Town and Country.

Early Soporifics. Hoatho, a Chinese physician, who lived in the third century, gave his patients a preparation of hemp, whereby they were rendered insensible during surgical operations. The soporific effects of mandrake are mentioned by Shakespeare.

Unaccountable Otherwise. A traveler who has recently returned from Japan alleges that he saw a really pretty Japanese woman while he was there. We suspect that he had been drinking when he met her.

Not a Profitable Job.

Origin of Bridal Customs.

As the wedding guests now gather
together at house and church, so
once did the bride's tribe gather to-
gether to rescue their stolen daugh-
ter. As now the wedding supper is
prepared, so once did they sit down
together in peace and amity after
marriage by capture had given way
to marriage by purchase, to the feast
prepared by the bridegroom to propi-
tiate his father-in-law.

Condemnation of Envy.

Envy is almost the only vice that
is practical at all times and in every
place, the only passion that can never
be quiet for want of irritation; its ef-
fects, therefore, are everywhere dis-
coverable, and its attempts always to
be dreaded.—Dr. Johnson.

"Pulling" or "Pushing."

The action of a horse hitched to a
wagon is generally regarded as pull-
ing. This is an old catch-question,
often answered by disputants with
the argument that since the animal
pushes against the breast-piece of the
harness, or the collar, his action is
therefore pushing.

From the Servants' Table.

Van Antler—"I think we are sure
of a good dinner tonight. You know
my new English butler does the en-
tire catering for the household."
Grubb—"Can you rely on him to?"
Van Antler—"Not always, but this
evening I requested him to send us up
something from the kitchen table."

Scientific Achievement.

"Do you approve of chemicals and
other foreign substances in food?"
"Certainly," answered the imagina-
tive scientist. "I am now engaged in

pepsia can be introduced into every
pie."—Washington Star.

National Development of Colleges.

One of the differences between love
and a puppy is that a puppy ceases to

old. Sometimes it takes love a little
longer to get its eyes open.

Would Interest the Bishop.

While the bishop of Stepney was
walking in London the other day a
newsboy came along crying, "Winner,
winner!" Then, seeing the clergy-
man, he at once altered his cry to
"Dreadful fire at Jerusalem."

Plausible Explanation.

We probably love the old songs
best because every one is singing the
new ones.

Advice to Girls.

"Be helpers of men," said the pres-
ident of Vassar to the girl graduates.
That will be well enough after they
get the men. In the meantime they
might help mother.—Kansas City

Work Fascinating.

There is an indescribable fascina-
tion about work. The laziest man in
town will stand watching with evi-
dent enjoyment the labors of a street
gang laying pavement.—Fory Worth
Record.

It Depends.

"How do you pronounce a-sting-y?"
the teacher asked the young gentle-
man nearest the foot of the class.
And the smart boy stood up and said
it depended a great deal whether the
word applied to a man or a bee.

Historical Amendment.

A western school journal is respon-
sible for the story that a youthful
pupil in the history class wrote the
following statement: "The American
war of independence took place be-
cause the colonies refused to submit
to taxation without temptation."

Must Do It.

When a man takes his wife to the
theater he thinks it's up to him to
go out between the acts and tele-
phone home to learn if the house is
still there.

first year he would be 68 feet tall at
the aged of 10.

French National Workshops.

Workshops were established by the
provisional government of France in
the revolution of 1848 to give work

Pity for the Malade Imaginaire.
Suffering, even if "imaginary," is
nevertheless real enough—the one
real thing, think those who have to
bear it, in a world of dreams and
shadows. Therefore, we must pity
even the fanciful valetudinarian.—
London Daily Mirror.

Pay Day Always Comes.
Bent Murdock's warning: "On

Kansas City Journal.

One of Lamb's Witticisms.

Charles Lamb was invited to a party
where the room was crowded with
children. Their noise and tricks
plagued him not a little and at sup-
per, when toasts were flying to and
fro, he rose to propose the health of
the "m-much ca-cacalumpated g-g-
good King Herod!"

Coincidence!

"Now, Tommie," said the teacher,
"you may give me an example of a
coincidence." "Why, er," said Tom-
mie with some hesitation—"why, er,

Beyond Reformation.

hand that rules the world.—Baltimore
Sun.

Wisdom of Little Value.

"Superior wisdom," said Uncle
Eben, "don't 'pear' to do much for
some people, 'ceptin' to keep 'em wor-
ried 'bout de mistakes dey is enabled
to notice in others."

Husbands and Babies.

After the baby comes, a woman re-
alizes that the lesson in patience she
had to learn to get along with her
husband, was only the a b c of what
she had to learn later.—Atchison
Globe.

Wanted a Cool Waiter.
A guest in a hotel sent this note to
the clerk: "Send me a cool waiter
to take my breakfast order. If you
have only fat, warm waiters I want
nothing for breakfast but an orange
with a very thick skin and two eggs
with the shells on."

Early Education.
One of the things daughter learns
long before her a, b, c's is that moth-
er had a chance to marry better.—St.
Louis Republic.

Sees Rest Ahead.
When you see a woman coming from
the station, looking perfectly content,
you may know what has happened;
her company has gone home.

Sense in This Prescription.
The prescription, "do not open your
mouth until you know exactly what
you want to say," will cure a lot of
things besides stuttering.

Will Not Need to Be Gone Long.
It never is necessary for a man who
starts forth in search of trouble to
carry his lunch along.

Castor Oil for Plants.
If a couple of tablespoonfuls of
castor oil are put near the roots of an
asparagus house fern it will cause
the fern to send up new stems or
branches sooner.

The Philosopher of Folly.
"There are a lot of men," says the
Philosopher of Folly, "who would
never be recognized as fools if they
didn't fall in love and give themselves
away."

Had Made Fools of Fourteen.
When a young girl entered a pawn-
broker's shop with 14 rings she was
suspected and detained. Inquiries
proved that she was the rightful own-
er and that the rings were souvenirs
of 14 fiances.

National Traits.
It takes one hour to know a French-
man, one month to know a German,
almost a lifetime to know an Eng-
lishman—well.—Rome Corriere.

Pretty Sure.
The man who bumps his face on
the sidewalk is pretty sure to find it
a concrete proposition.

Limit to Cork's Buoyancy.
A cork carried 200 feet below the
surface of the water will not rise
again.

Superman.
Only he is lord of riches who de-
spises them, and he is so whether he
has any or not.—Puck.

AN EYE TO FUTURE BUSINESS.

Minister—Who was that fellow talk-
ing to you so earnestly in front of the
church to-day?

Sexton—That's Mr. Hustler, the fa-
mous divorce lawyer.

Minister—What did he want?

Sexton—He offered me \$10 to pass
around his business cards to all the
bridegrooms who are to be married
here this month.

After the Rush.
German proverb: At evening the
sluggard is busy.

Tree Has Two Good Uses.
While the seeds of the dorewa, an
East Africa leguminous tree, are ex-
tensively used for food, the pods and
leaves form an excellent cement when
mixed with crushed stone.

The Pessimist.
We make him pause in his replin-
ing; make him admit the silver lining
may be there, as stated. Alas, he is
a hardened sinner, and says he'll
wager us a dinner that lining's only
plated.
